DETAILED ACTION***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1, 2 and 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 5, 6 and 8 suggest more than one aperture structure. It appears the claim would overcome the 112 second paragraph rejection, if the claims would recite that the aperture at a specific point along the optical axis has a different size.

With further regard to claim 1, while applicant provides two functions regarding aperture size compared to other apertures and a zooming step only being used when a macro shooting mode for obtaining a close-up of a subject is chosen, claim 1 does not provided specific structure which lends itself to correspondence for achieving the two functions claimed. The prior art teaches a zoom lens and an aperture at a zooming step between telephoto end and wide-angle end, but beyond that, claim 1 does not provide any additional structure that contributes to the functional recitations claimed. This rejection is considered overcome with structure sufficient to accomplish the functions claimed.

3. Regarding claim 6, the phrase "sectors that work as a diaphragm" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d). In MPEP § 2173.05(d), it is state that when exemplary language is stated in the claims, examples and preferences lead to confusion over the

Art Unit: 2873

intended scope of a claim and that in those instances where it is not clear whether the claimed narrower range is a limitation, a rejection under 35 U.S.C. 112, second paragraph should be made.

Claims not specifically mentioned are rejected based upon their dependence from a rejected claim.

Allowable Subject Matter

4. Due to the indefiniteness of the claimed invention, as described above, allowable subject matter can not be clearly ascertained.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taniguchi et al. (4550993) and Hariguchi et al. (5673099) are cited for disclosing a zoom lens comprising an aperture which is smallest at a particular zooming step.
